Art Unit: 1651

DETAILED ACTION

The preliminary amendment filed July 7, 2003, has been received and entered.

Claims 27, 28, 30, 31, 33-48, 97 and 98 are presented for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27, 28, 30, 31, 33-41, 46 and 48, drawn to a fungal delivery system comprising biodegradable material, saprophytic and mycorrhizal fungi, and seeds, classified in class 435, subclass 254.1.
- II. Claims 27, 31, 42-45, 47, 97 and 98, drawn to a cardboard box comprising biodegradable material, saprophytic and mycorrhizal fungi, and seeds,, classified in class 435, subclass 254.1

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related products. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the

Art Unit: 1651

inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the products are clearly mutually exclusive because a cardboard box cannot be any of the other forms recited in the claims. Moreover, because the claimed structures are entirely different, they have materially different designs, modes of operation, functions and effects.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction

Art Unit: 1651

requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Francisco C. Prats whose telephone number is 571-272-0921. The examiner can normally be reached on Monday through Friday, with alternate Fridays off.
